Course Topics

Day 1: Introduction to Sustainability

- Introduction to the concepts of sustainability and its relevance in higher education.
- Overview of global sustainability challenges and the role of educational institutions in addressing them.

Day 2: Sustainability in Campus Operations

- Case studies on sustainable campus management including energy use, resource conservation, and waste management.
- Interactive workshop on conducting a sustainability audit for educational institutions.

Day 3: Curriculum and Research

- Integrating sustainability into the curriculum across various disciplines.
- Exploring the role of research in advancing sustainability, including funding and publication strategies.

Day 4: Community Engagement and Policy

- Strategies for community engagement and the development of partnerships for sustainability.
- Discussion on policy frameworks supporting sustainability in higher education.

Day 5: Action Planning and Future Trends

- Developing personal and institutional action plans for sustainability.
- A lighter schedule with a guest lecture on future trends in sustainability and closing remarks.
